Abstract

This paper contains a critical assessment of how a related website interacts with our web application. In this article I'll be writing a review for the website "giftnideas.com" as it is relatable to our web app "Surprise BD". Apparatus, equipment, and processes will all be discussed as part of the website development process. This article will give the findings, their relevance, and a discussion of how the website connects to our project.

Introduction

From the beginning, we set out to create a website that would provide users with something unusual. We then devised a plan to create a website where people could receive gifts and surprises, and we got to work. We researched our concept and came up with some relevant websites, such as "giftsnidea.com". "giftsnIdeas.com" which claims to be a Brand of Giving Inc., the world's biggest international ecommerce gifting company, is an international gift delivery specialist with a vast network of local shops delivering people's favorite gifts to their loved ones in over 180 countries worldwide. Furthermore, they are extremely proud of their ability to provide real-time shopping assistance 24 hours a day, seven days a week. Anyone can contact the giftsnideas.com gift experts at any time, either through their live chat or by phone.

We started looking into why this website is related to our web app and how it differs from it when we discovered it.

Related works review

The project we've been working on, "Surprise BD," is a web app that lets people coordinate surprises and gifts. People might find one of these and give it to their loved ones as a personalized present. It will be a user-friendly website with all of the unique stuff. On the other hand, giftsnideas.com is an international online gift shop with a lots of unique gifts. In "Surprise BD", we have customized gift option that will help the user to choose and customize gifts to make the gifts unique, whereas "giftsnideas.com" doesn't offer personalized and customized gifts but they have an offer to send customers personalized message with any gift they select. We will be delivering gifts at customers preferred times. They have the option of delivering the present to the user's preferred address at any time zone the user in. "giftsnideas.com" provides gifts for all occasions, and we will strive to provide gifts for all events and festivals. This is what makes our project special. As "giftsnideas.com" is an online gift shop with a number of similarities with our web app, this is how it relates to our web app- Both the websites are made for delivering gifts and surprises. Both ensures original and premium quality gifts and fast delivery. Both of the website ensures users flexibility to choose a delivery date of choice.

Methods

The idea of giftsnideas.com took shape in 2005 when it was identified that there is no online gift shop that satisfies the need of gift deliveries across multiple countries in the world. Then, they started tying up with

the local gift shops in different countries. And now, they proudly deliver gifts to more than 180 countries in the world - within 24 hours". The delivery may happen either through direct delivery by local gift shop or by engaging a professional courier service like Fedex or DHL from the local gift shop, who directly deliver the gift at the doorsteps of the recipient, either the address of delivery is a residence or an office. They deliver gifts from a local gift shop in the country that people would like the gift to.

To build their website, they used a variety of frameworks and languages. The website is made up with HTML, CSS, Django, JavaScript, PHP, React, Bootstrap, Angular JS and some more frameworks.

Results

Every aspect of giftsnideas.com was examined and contrasted with our web app. The ability to deliver gifts at the customer's selected time is a unique feature of our online app. Customers will be able to choose gifts from our web app or create personalized gifts for their loved ones. This sets us apart from giftsnideas.com since we guarantee timely delivery at the customer's selected time.

Discussion

The features of our web app are unique. We'll need to include additional unique features and improve our present concepts to make our web app more user-friendly so that customers can use it fast and effortlessly. We will working to add more premium gifts and surprise ideas in our web app.

Conclusion

According to our research on "giftsnideas.com," we need to upgrade our web app to make it more advanced and elegant. Our idea for creating a surprise website is the same as theirs. We will engage skilled curators in the future to ensure that our customers receive real value every time they visit us.
