Abstract

In this article, I'll review a website called "upoharbd.com," which is somewhat comparable to our web app "Surprise BD". This paper will include a critical evaluation of how this website relates to our web app. I'll go over many approaches for building the website, such as instruments, equipment, and procedures. And again this paper will present the findings, their ramifications, and a discussion of how the website connects to our project.

Introduction

We researched our idea of building a web app to provide gifts and surprises to people and found some relatable websites such as "upoharbd.com". "upoharBD.com" is a Bangladeshi online gift shop that delivers gifts around the country. Anyone may send presents and flowers to their friends, family, and business clients in Bangladesh by ordering them online. They are available 24 hours a day, 7 days a week to help people send gifts to Bangladesh from Australia, Bangladesh, Canada, the United States, the United Kingdom, Saudi Arabia, Qatar, and other European and Middle Eastern nations. They deliver gifts to all of Bangladesh's cities, including Dhaka, Chittagong, and Sylhet. For birthdays, anniversaries, Eid, Ramadan, Valentine's Day, Mother's Day, and all other important occasions, customers can order cake, flowers, food items, and package gifts. After finding out this website, we started questioning ourselves why it is relatable to our web app and why it is distinguishable from our web app.

Related works review

The project we've been working on is called "Surprise BD," and it's a web app that helps people plan surprises and gifts. People can locate one of those and personalized gifts for their loved ones. It will be a user friendly website with all the original gifts. On the other hand, upoharBD.com is an online gift shop with 1700 gifts that they deliver all over the world. In "Surprise BD", we have customized gift option that will help the user to choose and customize gifts to make the gifts unique, whereas "upoharBD.com" takes great pride in offering exclusive collection of birthday cakes and wedding cake. They have an option for user as delivery to the address of user's choice and we will be offering the user their preferable time and place to deliver the gift and these are the uniqueness of our project. "upoharBD.com" offers gifts for every occasion and we will also be offering gifts of every occasions and festivals.

As "upoharBD.com" is an online gift shop with a number of similarities with our web app, this is how it relates to our web app-

-Both of the sites are made for delivering gifts and surprises.

-Both ensures original gifts and fast delivery.

-Both the websites have unique features in the websites.

Methods

Upoharbd.com is making the difference by assisting new customers to learn how to place an order. They also offer the most extensive payment options so that customers can place and pay for their order regardless their location, availability of credit card and access to payment facilities. "upoharBD.com" is meeting the demand of current busy lifestyle by providing urgent gift and same day gift delivery service.

The website is made up with HTML, CSS, JavaScript, PHP, Angular JS, React, Bootstrap, MongoDB, Django and some more frameworks. They gradually developed their website by using different frameworks and languages. But I think their website is not very striking to look at. They should have updated the pictures of their products as they used some dummy pictures from internet and those are very poor in quality.

Results

We looked at all of upoharBD's similarities and differences with our web app. Our web app's distinguishing characteristic is that we deliver gifts at the customer's preferred time. Customer will be able to choose gifts from our web app or they can customize gifts for their loved ones. This individualizes us from upoharBD.com as it provides fast delivery at their intended time. And again our web app is fascinating to look at than theirs.

Discussion

Our web app is unique in features. More unique and interesting features will be added soon to our web app. We will keep updating more features and components in it to make people more comfortable with our web app. And in order to accomplish so, we'll need to include additional unique features and enhanced present ideas so that buyers can use it quickly and easily.

Conclusion

Evaluating "upoharBD.com" indicated that we need to improve our web app to make it more sophisticated and stylish. Their idea of creating a surprising website is similar to ours. In future, we will be mastering curators to ensure that our customers genuinely find something of value every time they visit us. We'll keep looking for leaders in customization to deliver our consumers that extra personal touch in all the presents they send and receive.
